Microsoft Azure DocumentDB Client... 1.11.1

This client library enables client applications to connect to the Azure DocumentDB service. Azure DocumentDB is a NoSQL document database hosted in Microsoft Azure and delivered as a service. For more information, refer to <http://azure.microsoft.com/services/documentdb/>.

To install Microsoft Azure DocumentDB Client Library, run the following command in the [Package Manager Console](#)

```
PM> Install-Package Microsoft.Azure.DocumentDB
```

The screenshot shows the Azure DocumentDB Keys page. It has two tabs: "Read-write Keys" (selected) and "Read-only Keys". Below the tabs, there are several fields for connection information, each with a copy icon and a refresh icon. The fields are:

- URI: `https://ps-docdb.documents.azure.com:443/`
- PRIMARY KEY: `qJUn9xZenLnLatPZHd8QZNDlgDDXJe2MkCcStQV2wbuD2bfBoHI2PKNvEqbLrCjpPtjQ1kE`
