Serverless
Computing

Nanoservices

Azure Functions

Execute small
functions

C#, F#, Node, Ruby,
PHP

Pay only for
execution time

Triggers, webhooks,
and timers

Summary

```
public static async Task Run(CloudBlockBlob myBlob, string name, TraceWriter log)
{
    log.Info($"C# Blob trigger function Processed blob\n Name:{name}");

    var uri = GetUri(myBlob);
    var analysis = await GetAnalysis(uri);

    log.Info($"results: {analysis}");
}
```
